Dumor Air Blast Jogger

Dumor **air blast jogger**

for digital print

The world's first modular air jogger that expands as your needs grow. Digital print is typically heavily static charged when it comes off the press and not runnable as such due to the inter sheet adhesion. The dumor airblast jogger fixes all of that by forcing a high powered jet of air into the pile and gently jogging the sheets to perfect alignment, ready to load into your next finishing device with less trouble from miss-feeds and double sheets.

Innovation! Quality! Value!

Technical specifications

Model	Dumor air blast jogger
Min paper size	Approx a6
Max paper size	Approx a3 (350 x 500)
max load	Approx 5cm pile*
Variable jogging speed	
Variable air blast	
Timer	
Inclination angle adjustable to approx 30 deg from vertical	
Table top base version	
Optional stand	
Optional air blast	
Soft jogger table with special liner reduces noise by 80 pct and eliminates damage to the ends of the sheet	
Jogger table is made to curve the paper so it wont roll up in the tray	
CE certificated	
* note that with extra heavy load the vibration intensity will be reduced	
table top weight	30kg
stand weight	50kg
power	60W base version
power	1000W air blast version

Features

- The worlds most advanced jogger
- Variable speed
- Variable timer
- Soft tray line reduces noise and damage to sheets
- Optional air blast ensures all static is eliminated
- Special curved tray avoids paper rolling up and collapsing
- Able to evolve from a table machine to a stand alone device with air blast
