

HF3010

Calendar Thumb Cutter/Round Corner Cutter

Description

A multipurpose desk top tool supplied with back and side lay to accurately punch thumb cuts for calender production. Enables the user to utilise an existing wire binder to punch holes and then remove thumb cut as a second process. HF3010 can also be used for 3.5, 6, 10mm radius corner cutting and can be used for single hole punch or chamfer cutting.

Features

- All steel construction for years of trouble-free use
- Produces calendar thumbcuts and radius corners
- Supplied with spare cutter pads
